

PROJECT: Environmental Compliance Audits, Power Facilities, NY

CLIENT: Confidential

Epsilon conducted environmental compliance audits of gas turbine combined cycle generating plants. Audits included review for compliance with Title V Facility Permits, SPDES wastewater, NOx Budget and Acid Rain Program, and CEMS. Epsilon also developed an Environmental Management and Tracking System for each of the facilities.

PROJECT: Acquisition Due Diligence, MA

CLIENT: Central Hudson Gas & Electric

Epsilon conducted environmental due diligence for acquisition of a coal and oil-fired power plant. Compliance with existing environmental permits was assessed including air, waste water discharge, once-through cooling NPDES, and solid waste. Site and groundwater conditions related to hazardous waste were assessed. The feasibility of repowering the facility, including 316a and 316b permitting, was evaluated.

PROJECT: Acquisition Due Diligence, Multiple Facilities, New York State

CLIENT: CH Resources

Epsilon conducted environmental due diligence for acquisition of three cogeneration facilities in New York, including the former Kamine/Besicorp Syracuse and Beaverfalls plants. Responsible for environmental compliance and permit modifications for Syracuse, Niagara Falls, and Beaver Falls plants, including repermitting for low load operation and alternate fuels (e.g. TDF), NOx Budget monitoring plans, EDR's, and CEMs quarterly reports.
